

Statement on Regulations

We hereby confirm that our products comply with

Regulation **(EG) No. 1907/2006**, Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH-Regulation) including the latest amendments in the valid edition. Substances in the products are accordingly to the regulation registered unless the substance is not except from the registration.

Also we confirm that, accordingly to the current version (22.08.2022), no substance of very high concern (SVHC) according to **REACH-Regulation Annex XIV (EG) No. 1907/2006** with a concentration above 0,1 weight percentage is contained in the products. As the listing in Annex XIV is extended dynamically, this statement is only valid for at this time included substances.

Further we confirm, that our products comply with the **RoHS-Regulation 2011/65/EU** (former 2002/95/EG) on the restriction of the use of certain hazardous substances in electrical and electronic equipment and **Amendment (EU) 2015/863** and **Amendment (EU) 2017/2102** in the at this time valid version.

Please note: Many chemical substances are ubiquitous and therefore could be found especially with very sensitive analytics as a contamination in the products. These substances are not within scope of our quality assurance.
