

## PRESS RELEASE

Kirchheim, February 7, 2023

### **hubergroup Chemicals debuts at the European Coatings Show**

**hubergroup Chemicals, one of the largest manufacturers in the chemicals sector announced its participation at the European Coatings Show 2023 in Nuremberg, Germany. The chemicals specialist will showcase its state-of-the-art portfolio of resins, colourants, lamination adhesives as well as monomers and present its capabilities in custom manufacturing. It places a particular focus on radiation curing technologies for industrial coatings as well as the printing ink industry. For hubergroup Chemicals, the hot topic of sustainability is an integral part of daily business, both in its production plants in India and its laboratories in India and Germany.**

hubergroup Chemicals was launched in 2020 as an independent division of hubergroup. Based on its extensive production capacities of more than 250 KT and over 100 reactors, hubergroup Chemicals has gained many international and regional customers in the chemical, coatings and printing ink industries within the last two years.

At the European Coatings Show 2023, hubergroup Chemicals presents its portfolio at a European exhibition for the first time. This contains sustainable raw materials for industrial coatings, mainly focusing on the wood and furniture sector as well as polymer/LVT flooring, such as radiation curing oligomers and monomers. Conventional drying resins based on rosin, ketone, and polyurethane as well as some special additives complete the portfolio. In addition, the chemical specialist will showcase its state-of-the-art lamination adhesives (2K PU systems), which are already used by many satisfied customers on the Asian market and will soon also be launched in Europe. The portfolio further features raw materials for printing inks and overprint varnishes such as resins, additives and colourants. The total quantity hubergroup Chemicals provides to the coatings and inks industry will soon exceed 20,000 tons. Next to these high-quality standard products, the chemicals specialist offers custom manufacturing and has proven within the last two years that it quickly reacts to market needs by developing new products or adapting existing ones. Thus, hubergroup Chemicals offers all chemical companies a unique opportunity to quickly, reliably, and sustainably develop a footprint in the fast-growing Indian chemical market.

Taner Bicer, President of hubergroup Chemicals, says: "We are really excited about exhibiting at the European Coatings Show 2023. It is a great opportunity to get in touch with customers and interested visitors and better understand their daily challenges. So, I warmly invite everyone intrigued to visit us at our stand – we look forward to seeing you!"

You will find hubergroup Chemicals in hall 3A, stand 341.

#### **About hubergroup**

hubergroup Chemicals produces speciality chemicals such as resins, lamination adhesives, additives, and colourants in its facilities in India. Launched in 2020, it is a division of the international chemicals and printing inks specialist hubergroup which is based in Germany and has a history of over 255 years. hubergroup Chemicals is the largest UV oligomer producer in India and concentrates on the customized manufacturing of radiation curing UV oligomers. Dedicated experts enable advanced

product developments in research departments based in India and Germany. As the largest Rosin based Resin producer in India hubergroup Chemicals is a very experienced supplier in modified resins. Not to forget its role as India's leading player in terms of pigment synthesis capacity. hubergroup employs about 3,500 people in nearly 30 countries and generated an annual turnover of about €704 million in 2021.
